MIS Job Outlook*

- According to the 2006-2007 Occupational Outlook Handbook, employment of technology professionals is expected to increase much faster than average as technology becomes more sophisticated and organizations continue to adopt and integrate these technologies. This occupation is expected to rank among the top 20 in the number of new jobs created over the 2004 – 2014 period.

- Because employers continue to seek professionals who can combine strong technical skills with good interpersonal and business skills, graduates with a bachelor’s degree in MIS should enjoy favorable prospects for employment.

Why Study MIS at Miles College?

Do you like computers but fear being stuck programming them all day?

Do you like business and want to help with your knowledge of information technology?

If your answer is YES to these questions, MIS is for you.

Mission
The mission of the Miles College Management Information Systems Program is to develop leaders who are capable of using the latest information technology to optimize strategic planning and to give competitive advantage to organizations and businesses.

Management Information Systems
The Division of Natural Sciences and Mathematics at Miles College offers the Bachelor of Science Degree in Management Information Systems in collaboration with the Division of Business and Accounting. This interdisciplinary program prepares the student to apply information technology to support organizational and managerial needs. The graduate of the MIS program will be able to:
1. Create database models by applying data modeling techniques.
2. Apply the latest application development tools for business systems development.
3. Determine the most appropriate systems analysis and design techniques.
4. Implement a database model in a relational database management system.
