

Miles is enhancing its mission with the expansion of its academic curriculum to effectively serve the needs of the market place and strengthening its role as a leader in innovative learning and strategic community partnering. Miles College's recent acquisition of the nearby 41-acre site of the former HealthSouth Metro West hospital doubles the once landlocked college's campus size. *Miles Ahead*, a multi-phase, comprehensive campaign, will support opportunities for academic programming and facility growth, as well as, endowment for student scholarships and faculty development. The first phase of the *Miles Ahead* effort has a goal of \$30.6 million and has as its focus a new Health and Wellness Center, a new Student Center, the Honors Student Program, and Scholarships.
